*Parent Newsletter
February 2020*

Dear Parents,

It is hard to believe that we are already in the month of February. February is traditionally a month in which we celebrate those we love, and boy do we love our kiddos here! The classroom bonds being formed are awfully sweet to witness. Registration will begin for our current preschool families and alumni on Wednesday, February 5th, from 7:00-8:30 in the Conference Room of the WFLC. Enrollment forms and class lists are available in the preschool office or on our website, www.hoperidge.com, under the "Preschool" tab in the "Forms" section. Open registration begins on February 8th, from 9:00-11:00. We sincerely appreciate your recommendations to others who may be looking for a preschool home for their children!

You should have received your mid-year tuition statement. If you have any questions regarding your balance, please contact the preschool office. As always, we greatly appreciate your commitment to timely tuition payments.

Looking Ahead:

- | | |
|-------------|---|
| 2/4 & 2/5 | Dentist visits (Oral Health Program) |
| 2/5 | In House Registration, 7:00-8:30 PM |
| 2/7 | Fun Friday, Princess Tea Party, 11:15-12:45 |
| 2/8 | Open Registration, 9:00 AM-12:00 PM |
| 2/13 & 2/14 | Valentine's Day Parties |
| 2/17 | President's Day, NO SCHOOL |
| 2/27 & 2/28 | Conferences for 3's Classes |

Best wishes for a lovely month,
Nikki Davis, Director

A GUIDE TO HELPING **YOU fight the FLU**

KNOW WHEN AND WHERE TO SEEK TREATMENT

Ok to wait

Consider waiting until the next morning to see a doctor when your child:

- is urinating normally, even if he has a fever
- is playful, eating well and interactive

Call a doctor

You should call a doctor when your child:

- is lethargic
- has a fever for more than three days
- will not take liquids or does not urinate at least every 8 hours

Go to the ER

You should go to the Emergency Room when your child:

- has shortness of breath (if severe difficulty breathing call 911)
- is not alert (if unresponsive call 911)
- has dry lips, sunken eyes or decreased urine

The best defense against the flu is **vaccination**

For more information about the flu, go to childrens.com/flu.
